

STAND-UP DINOSAUR

instructions

Note: It's OK to ask your parents to help!

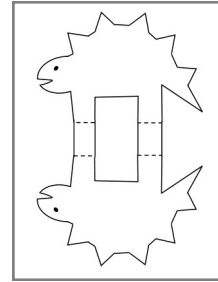

You will need these tools and supplies:

The dinosaur shape printed on heavyweight paper or cardstock

Colored pencils, markers, and/or crayons

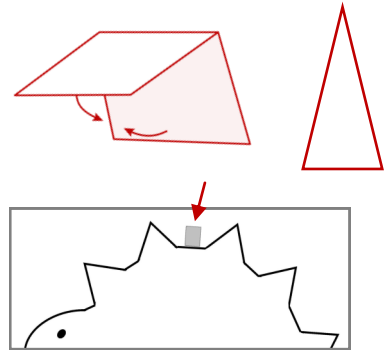

Scissors

Clear adhesive tape

Step-by-step instructions:

1. Color in the dinosaur shape (page 2).
2. Cut out the dinosaur shape by cutting on the solid black lines. Don't cut on the dotted black lines or the **blue*** lines.
3. Fold the dinosaur shape along the dotted black lines.
4. Pull the front and back of the dinosaur together, like a tent.
5. Place a piece of adhesive tape on the front and back at the top of the dinosaur shape.
6. The dinosaur will stand up on his own now.

If you want to cut out the rectangle formed by the **blue lines, go right ahead...but it's a fussy kind of cut, so be careful!
